EMMA SALISBURY

Frontend Developer & Photographer

I am a freelance creative specialising in Web Design, Frontend Development, and Photography. I love utilising these skills together, so that I can get my clients from idea to completed product. My photography started as predominantly portrait photography, but I am able to capture whatever you need to get your website up and running.
To create your projects, I translate your design, using either vanilla or React. I use VS Code, and feel comfortable integrating systems like Bootstrap, and API's when they're needed.
I am currently learning about PHP and wordPress.

PROJECT EXPERIENCE

REACT DICTIONARY APP   2023
Can be found through my GitHub

- This project involved integrating a dictionary API, that then feeds into an image search API. The majority of this app was built using JavaScript.

REACT WEATHER APP   2023
Can be found through my GitHub

- This project involved integrating a weather forecast API, and a current location search, that then feeds into an icon API. The majority of this app was built using JavaScript.

PHOTOGRAPHY WEBSITE   2023
www.emmasalisburyphotography.com

- This website was built predominantly built with CSS.
- I have made the site fully responsive using media quotes.

PORTFOLIO WEBSITE   2022
www.emmasalisburydesigns.com

- This website was built to showcase the projects that I have built so far, it has links to my LinkedIn, GitHub Repository, and other websites.
